## August 5

10:30 a.m. Blowout occurred. Safety secured and pH and metals sampling begins.

On site OSC make calls to downstream (Silverton and Durango) local contacts

In the afternoon, OSC on site notified R8 duty officer at Denver Operation Center. Initial reports were that it was discharging into a virtually dead creek, and anticipated impacts were focused on Cement Creek and town of Silverton.

R8 ARA notified mayor of Silverton; and San Juan County officials. EOC notified CO Dept. of Health and Environment.

CDPHE issued notice to Drinking Water Systems downstream.

Began issuing daily statements on the event.

### **August 6**

Began constructing treatment system at mine.

In the morning, R8 management began to deploy resources beginning to recognize the significance of the release.

RA contacted Governor's Office, DNR Director, CDPHE Director of Environment, mayor of Durango, LaPlata County Commissioner, and EPA HQ (DRA and CoS).

Sr. Policy Advisor notified R6 DRA.

R8 deployed Incident Commander and a Public Information Officer.

START was deployed.

Began coordination with ATSDR

We began to set up R8 Golden lab and ESAT.

**August 7**

-  
Mine discharge treatment and monitoring begins

In the morning, EPA's ASPECT aircraft begins flyovers.

Issued a health statement on pH

Unified Command established

Sen. Bennet and Sen. Gardner visited Durango Incident Command Center.

R8 RA and Director of Emergency Response flew to Durango early morning to meet with elected officials, Sheriff Smith, and staff from County, City and S. Ute Tribe. In the afternoon, the RA hosted a public meeting, attended by an estimated 250 people, to describe the blowout, EPA's response, and field questions. RA also held a media availability.

Contracted with a commercial lab in Durango.

Alternative sources of drinking and stock water begin to be provided to affected well owners and well sampling begins

**August 8**

-  
Began daily calls to Congressional offices, state and tribal officials, and local elected officials; began daily media calls.

Began sole-source contracting with La Plata County.

Released summary select metals data report spike and evidence of sharp trend to prevent conditions in Cement Creek and upper Animas locations.

Released detailed data table of Aug 5 and 6 results

### **August 9**

RA flew back to Durango with ARA

Announced Claims process

Updated discharge estimate to 3 mg

### **August 10**

Large Region 8 response team deployed to Durango

### **August 11**

Established Area Commander, Region 8's David Ostrander, and his PIO, Melissa Harrison

Unified Command in place and building

**Subject:** RE: chronology

Joan,

Thanks. I am just looking for a pretty straight-forward sequencing of events – really high-level – when the release happened, when we started to notify folks – when we mobilized – pretty basis – for the boss, for now.

**Subject:** Re: chronology

David, the detailed chronology I referred to is the Region 8 Administrative Record for FOIA and other purposes. I think this one that Matt is building with all of us will serve communication purposes better.

Matt: we have a team developing a detailed chronology. Are you asking for public statement about chronology or do you need it for your work? If so, when do you need it so I can instruct the team accordingly.

Good morning everyone,

Do we have a tight chronology of events? This just has to be the major items or actions.

For example:

August ... - release occurred as EPA/contractor was working at the site

August ... EPA notified...

(notification sequence would be helpful)

August....Unified Command was established

Summarize: as of August...### samples have been collected from ### locations along both the San Juan and Animas River.

Those type of highlights.

Thanks.
